

SMART-I CAM (iOS) - DOWNLOAD VIDEO RECORDINGS FROM THE SMART HOME CAMERAS

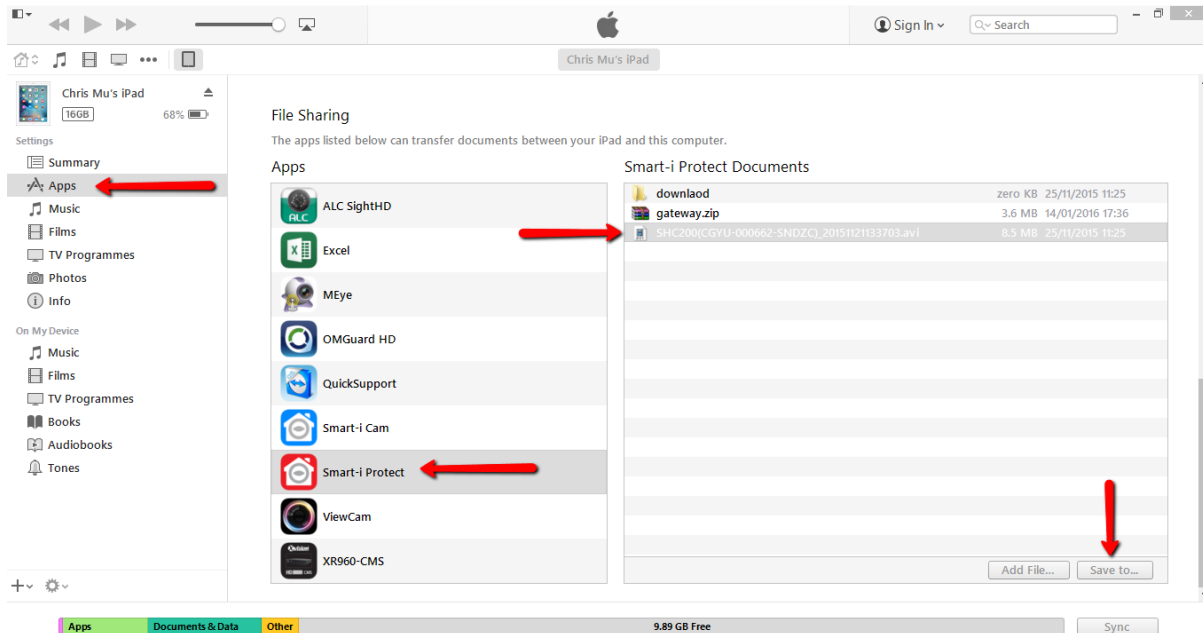

In order to download video recordings from the Smart Home Cameras you need to open the Smart-I Cam application on your iOS Device.

Tap the Event button at the bottom/middle of the screen and then tap the Edit button top/right of the display and then you can tap the download button next to the video recording you wish to download – a Download Progress window will pop-up.

For technical support, please contact your local distributor.
Alternatively, call 01483 397000

You will then need to connect your iOS device to your PC/MAC and open iTunes and select your device. Then you need to select Apps and scroll down to the File sharing section, select the Smart-I Protect app and then select the video file, click save to and select the destination to save the AVI file.

For technical support, please contact your local distributor.
